

Doosan Forklift Part

Doosan Forklift Parts - Doosan Infracore Company Ltd. is an international and intercontinental corporation which features Defense Industry Products, Industrial Vehicles, Diesel Engines, Automation Systems, Machine Tools and Construction Equipment.

In the United States, Doosan Infracore America Corporation is headquartered in Suwanee, Georgia. It is home to a 170,000 square foot production facility, which is the home of the Compact Equipment and Construction department. West Caldwell, New Jersey is home to the Machine Tool division and Cleveland, Ohio is home to the Forklift division. The U.S. headquarters in Georgia facilitates a first rate parts operation capable of supplying an excess of 25,000 line items to support Lift Truck, Compact Equipment, Machine Tool and Construction customer wishes.

There are well over 220 Doosan service and product sales locations operating in Canada and the United States. Furthermore, there are more than 90 independent dealers moving lift truck supplies and materials handling equipment. This network allows Doosan Infracore America to aggressively compete in this competitive market. The forklift product line impressively includes 63 different products consisting of 82 various battery and engine configurations of Electric-powered and Internal Combustion vehicles. Capacities of these various truck models range from 3,000 to 33,000 lbs. All trucks are built in an ISO 9001 qualified facility.

Doosan Infracore America is the fastest emerging forklift and lift truck corporation in the North American market, due to its exceptional level of product performance and their persistently high level of buyer support and service given to all Doosan Infracore Forklift clients. The U.S. lift Truck division situated in Cleveland has a skilled team knowledgeable in Sales, Purchasing, Advertising, Logistical and Technical Support.

At first the home-based lift truck marketplace in Korea was an open import enterprise. Korea Machinery Co. Ltd. began in 1960, to import fully assembled lift trucks as part of a home-based machinery expansion project. Sales of these goods were originally targeted to state-run companies, large scale businesses, and the military. This ultimately led to a unification with Daewoo Heavy Industries Ltd. In 1976, the Forklift Division begun business operations throughout Korea to overhaul and sell this heavy equipment. By 1978, a forklift manufacturing plant was successfully completed. Continuous technical training grew to become the new focus for improving quality and product development.

Domestic forklift business for Daewoo started in 1967 and grew to an amazing 90% market share in Korea. By the 1980's, Daewoo's progressive technological improvements combined with sales success placed them in a position of substantial expansion of their forklift operations.

In 1981, Caterpillar Industrial Inc. of the United States, proposed a joint venture project to respond to competitive pressures in the US materials handling industry. This endeavor radically expanded Daewoo's forklift sales. Construction was finished in 1984 to facilitate a modern plant which helped establish the company for the fabrication of high added-value products suited for export. In 1993, the company had a international sales system and started exporting models they had developed through in-house expertise, as an sovereign brand. Certifications were then acquired from CE of Europe, UL of the United States and ISO 14001 and ISO 9001, securing growth possibilities into international marketplaces.
