

JLG Forklift Parts

JLG Forklift Parts - In the late 1960's John L. Grove, with his wife Cora started out on a cross country journey in their RV. Newly retired, after spending several years working with his brother to develop their crane business into an industry leader, John had no idea that momentous trip would permit JLG Industries, Inc to emerge. The world leader of mobile aerial work platforms and precision material handling technologies was the end result of a road expedition.

Whilst on their journey, John spent time talking to previous business acquaintances whom the Groves stopped to see along the way. These conversations combined with a tragic occurrence-two workers being electrocuted on scaffolding when the Groves were traveling to the Hoover Dam- John discovered an infinite marketplace for a product that could promptly and securely lift individuals in the air to accomplish upkeep and other construction functions.

After returning from their vacation, John set up a joint venture with two of his friends and bought a metal fabricating business in McConnellsburg, Pennsylvania. Opening with a small crew of twenty workers, they fashioned and sold their first JLG aerial work platform in 1970. The company incorporates many of the simple design essentials of that original lift into existing versions.

JLG lift trucks have come a ways since Mr. John L. Grove came back to town from his cross-country road trip and since the initial aerial work platform debuted on the market. Nowadays, the company proudly continues to expand itself into a range of marketplaces worldwide and develops new products to make sure customers are capable of being more efficient and perform in the workplace within a safer atmosphere.
