

Barrel Clamp

Barrel Clamps - A Barrel Clamp is actually a hydraulic or mechanical accessory designed for a forklift. It could be used to squeeze the object you want to move utilizing the lift truck and is usually used for handling barrels, kegs and paper rolls. A few types of barrel clamp attachments likewise have a revolving function. Like for example, the revolving function permits the individual operating the forklift to be able to put in a vertically stored paper into the horizontal intake of a printing press.
